OBJECTIVE

To obtain a full-time position in Sr. Front-End Engineer.

PROFILE

A passionate and self-motivated Web Developer with over 15 years of professional experience in building dynamic, user-friendly websites and applications. A proactive learner and collaborative team player, skilled in working within Agile environments. Specializes in translating UI/UX designs into clean, scalable, and maintainable front-end solutions that align with business goals.

EXPERIENCE

Sr. Front-End Engineer, Supermicro - New Taipei City, Taiwan • 09/2023 - 05/2025

- Develop and maintain the company's e-commerce platform using ReactJS.
- Enhance user experience for eStore System Builder through UI improvements.
- Collaborate with the Manager and UI/UX Designer to implement new user flows.
- Support additional tasks based on Project Manager requests.

Software Engineer - Front-End, Gorilla Technology Group - Taipei, Taiwan • 12/2017 - 08/2023

- Build and maintain the company's security products and internal tools using ReactJS.
- Collaborate with project leaders and engineers to ensure timely delivery of project.
- Define technical specifications and flows in coordination with Project Managers.
- Contribute technical insights and provide feedback to the UI team during design meetings.

Front End Developer, ASUS - Taipei, Taiwan • 05/2017 - 11/2017

- Develop the ASUS ROG Forum site from the ground up using Vue.js.
- Maintain the company's official site to ensure performance, stability, and up-to-date content.
- Build and support official brand websites as well as internal company platforms.

Sr. Software Engineer, Verizon - San Jose, CA USA • 08/2014 - 05/2017

- Collaborate with Product Managers and Designers to clarify product spec and workflows.
- Provide technical feedback during the planning and development of new projects.
- Contribute as part of a small, agile development team to deliver solutions efficiently.
- Participate in brainstorming sessions to refine prototypes through multiple iterations.

Web Developer (Contractor), Google - Mountain View, CA USA • 05/2013 - 05/2014

- Develop and maintain websites serving global Google users.
- Create high-quality, responsive web content optimized for both desktop and mobile platforms.
- Handle project requests and resolve bugs while meeting tight deadlines.
- Collaborate with Project Managers to gather feedback and ensure project alignment with goals.

Staff Software Engineer, E*TRADE - Menlo Park • CA USA • 10/2011 - 04/2013

- Build user interfaces for web-based mobile applications optimized for tablet devices.
- Collaborate with Project Managers and QA teams in the development and testing lifecycle.
- Develop pixel-perfect applications to support multiple mobile platforms.
- Debug and resolve cross-browser and cross-platform issues on touch-screen devices.

Web Developer, QuinStreet - Foster City, CA USA • 08/2006 - 08/2011

- Collaborate with Web Producers to align efforts with the company's business goals.
- Develop and enhance website performance, usability, and overall effectiveness.
- Design and implement reusable components for internal use across corporate websites.
- Contribute to both client-side and server-side development for full-stack solutions.
